RA/7 – The new z/OS RACF Report Writer

- ✓ 100% IBM IRRADU00 compatible
- ✓ easy to use
- ✓ easy to install
- ✓ unlimited report generation capabilities using the 3rd party product QPAC (optional)
- ✓ supports OpenEdition
- ✓ no TSO terminal monitor program required to produce reports
- ✓ no DB2 or any other database system required
- ✓ does not need ICETOOL TOOLS (IBM) which can only be used with the IBM SORT product, but not e.g. in CA-SORT
- ✓ eases portability for corporate auditors to perform RACF audits
- ✓ does not need any other 3rd party product (e.g., FOCUS run-time)
- ✓ supports active SMF files (e.g., SYS1.MAN1,2,3.....)
- ✓ supports off-loaded SMF files (e.g., archived on tape or disk)
- ✓ supports off-loaded IRRADU00 flat files
- ✓ saves disk space and greatly reduces any costly I/O overhead
- ✓ delivers reports much quicker because no DB2/FOCUS/PC loading is required
- ✓ creates one report, detailed or short, for each RACF EVENT code
- ✓ supports the creation of multiple (EVENT code) reports in a single pass
- ✓ supports event code statistics
- ✓ supports event qualifier statistics per event code
- ✓ supports RACF profile name statistics (event code: ACCESS)
- ✓ supports RACF resource name statistics (event code: ACCESS)
- ✓ allows to search for any data string using - ANY data-string control card
- ✓ RA/7's RCP option (program RA7\$SMAN) allows to recreate all RACF commands issued by any user. Command skeletons are available in the file RA7xxx.ISPSLIB
- ✓ RA/7's RCP option (program RA7\$SMAN) allows a user to recreate any type of commands. All IRRADU00 field names are automatically defined to ISPF
- ✓ supports forward-log-recovery to synchronize e.g. a restored RACF database
- ✓ supports the creation of SMF history records
- ✓ supports the creation of IRRADU00 history records
- ✓ RA/7-RSL - RACF SMF logger for instant review of issued RACF commands
- ✓ RA/7 interfaces to REXX
- ✓ RA/7 provides an ISPF interface allowing to browse active and off-loaded SMF files. Most RA/7 ISPF panels can be tailored according to the needs of an installation.

- ✓ RA/7 Online can interface to RA2002 to perform access simulation and to drill down on groups and or user-IDs.

FORWARD-LOG RECOVERY

FORWARD-LOG RECOVERY function, makes possible to Rebuilt your RACF database.

- ★ RE-CREATE RACF commands
- ★ SYNCHRONIZE RACF DB

FORWARD-LOG-RECOVERY is entirely based on the data found in the IRRADU00 RACF

COST JUSTIFICATION

Use RA/7 and SAVE time and money!

RA/7 A brilliant and cost effective solution

IRRADU00 Flat File

RA/7 The new OS/390 RACF report writer

RA/7 reports including extensive statistics

IRRA7RSL

RA/7-RSL - RACF SMF logger for instant review of issued RACF commands

RA/7 interfaces to REXX
